### **High Pressure Equipment**

## **NPT – Valves, Fittings and Tubing** 10,000 and 15,000 psi service

High Pressure Equipment Company has developed a line of NPT products to assure safe and easy plumbing Thigh Pressure Equipment Company has developed a line of NPT products to assure safe and easy plumbing through 15,000 psi. These needle valves, fittings, line filters, check valves, safety heads and rupture discs are engineered to the highest standards of repeatable quality. The reliable performance of these products has made HiP one of the world's leading suppliers of elevated pressure components. Valves are available in  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , and 1" to satisfy widely varied requirements. A line of fittings is available to facilitate adapting to Taper Seal, High Pressure or Medium Pressure.

**Non-rotating tip stems** are standard for on-off service and insure long life on valve seats. Regulating tip stems are available for all valves at no additional cost.

**Materials** include high tensile Type 316 stainless steel for valve bodies, and hardened 17-4PH stainless steel for lower section stems.

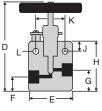

**Packing** is Teflon (450°F) standard with optional Viton (350°F), BUNA-N (200°F) and Grafoil (650°F) available at no additional cost.

Air operators for remote control operation are available for all valves. (See Air Operator section of catalog).

### **NPT Softseat Check** Valves

Soft seat check valves insure flow in one direction only and can be mounted in any position. These are highly reliable for both gas and liquid service. Standard O-ring (soft seat) material for the sealing surface is Buna-N (nitrile) with other materials including Teflon and Viton available on request. Temperature is limited by the choice of O-ring material. Material of all other parts is high tensile 316 stainless steel.

### **NPT Safety Heads**

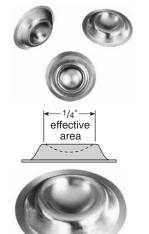

The male inlet design can be inserted directly into the tubing connections of valves and various fittings such as tees and crosses, or located in pressure vessels. Outlet connections are  $\frac{3}{8}$ " pipe (NPT). This outlet may be connected to a suitable discharge line to vent pressure to a safe location in the event of bursting of the rupture disc. Torque required for sealing rupture discs will range from 40 to 90 foot pounds, depending upon pressure and media being used.

Material of body and hold down nut is high tensile 316 stainless steel.

Note: Rupture discs are not included and must be ordered as a separate item.

Catalog No.	psi	Connections	Length	Hex	
15-61NMA	15,000	<sup>1</sup> / <sub>8</sub> " MNPT	2"	1"	
15-61NMB	15,000	<sup>1</sup> / <sub>4</sub> " MNPT	2"	1"	
15-61NMC	15,000	<sup>3</sup> / <sub>8</sub> " MNPT	2"	1"	
15-61NMD	15,000	<sup>1</sup> / <sub>2</sub> " MNPT	2"	1"	

### **Rupture Discs** 1/a Angled Seat

#### SPECIAL DISCS are

available on special order for pressure ranges not shown above and in numerous materials and coatings. Consult factory for price and delivery.

Standard rupture discs are available from stock in burst pressures as listed in the chart below. All pressures through 15,000 psi are shaded. These discs are 316 stainless steel (except for 1,000 psi which are inconel) and may be used with any of the safety heads shown. Note that these rupture discs are supplied with a tolerance of plus 6% and minus 3% of specified burst pressure. Samples of each batch are tested and the actual average burst pressure is stamped on an accompanying metal tag. Factors influencing rupture disc life include corrosion, metal fatigue, and cyclic effects. Periodic replacement is recommended to prevent premature failure.

### Standard Burst Pressures (in psi at 72°F)

1,000	3,000	5,000	7,000	9,000	11,000	17,500	25,000	37,500	55,000
1,500	3,500	5,500	7,500	9,500	11,500	18,000	27,000	40,000	60,000
2,000	4,000	6,000	8,000	10,000	12,500	20,000	30,000	45,000	65,000
2,500	4,500	6,500	8,500	10,500	15,000	22,500	35,000	50,000
